

SHURGROW

ELEVATE™

Foliar Micronutrient + Biostimulant

ShurGrow Elevate™ Power Crop Performance from the Top Down

ShurGrow Elevate™ is a foliar-applied micronutrient and biostimulant blend engineered for **rapid uptake and compatibility** with a wide range of crop protection products. Applied during key growth stages, Elevate **supports reproductive development, stress tolerance, and nutrient efficiency**, helping plants maintain photosynthetic activity and yield potential when environmental or metabolic stress threatens performance.

By combining essential foliar nutrition with physiological support, Elevate delivers balanced nutrition that works in season to sustain growth, protect yield, and keep crops performing at their best.

TARGET NUTRITION UPTAKE

Proprietary delivery system enhances absorption of foliar-applied nutrients
Optimizes uptake and grain fill for higher yield potential

PHOTOSYNTHETIC ACTIVITY

Maintains chlorophyll content and enzyme activity
Protects chloroplasts through enhanced antioxidant defense

DROUGHT & HEAT STRESS

Improves water retention and efficiency
Strengthens roots for consistent nutrient uptake
Shields cells from dehydration and heat damage

NITROGEN ASSIMILATION

Improves nitrogen uptake and assimilation under stress
Activates key enzymes such as nitrate reductase

KEY MICRONUTRIENTS

Boron B

Supports flowering, pollination, and seed development. Includes a stabilized cross-linked form for 6x greater foliar mobility.

Manganese Mn

Drives early root and shoot growth, chlorophyll formation, and overall plant vigor.

Zinc Zn

Drives early root and shoot growth, chlorophyll formation, and nutrient uptake.

BIOSTIMULANT

Phytosterols

Naturally occurring compounds that enhance stress tolerance by maintaining membrane stability, water balance, and enzyme function under heat, and drought stress.

WHY IT MATTERS

Promotes balanced nutrition and efficient nutrient transport through foliar pathways
Helps crops recover quickly from stress events
Improves grain fill and yield consistency
Compatible with most herbicides, fungicides, and insecticides

Guaranteed Analysis

Sulfur (S)	1.7%
Boron (B)	1.0%
Manganese (Mn)	3.1%
Zinc (Zn)	3.1%

Derived from boric acid, manganese sulfate and zinc sulfate
